SEVEN™ DT-125 POULTRY BARN STRAW SPREADER

BENEFITS

- Limited maintenance, simple design, low power requirements
- Quicker and more efficient than hand spreading
- Axial spreaders ensure uniform placement of straw up to 19.5' wide
- Straw is spread virtually dust free without the possibility of ejecting stones ensuring safety for user and animals
- Well ventilated bedding allows for real savings in straw
- The picker rollers with retractable fingers pull the compacted straw, which regains all its volume before being spread by the axial discs
- Versatile machine able to handle large square bales as well as round bales
- More comfortable livestock translates to higher production and increased profits

FEATURES

- Draw bar attaches to lower links of Cat. II 3 point hitch for tractor attachment
- Poultry spreader has lower stance and features protected wheels for extra stability
- All hydraulic powered, from only one set of remotes, no PTO needed
- The picker rollers rotate at constant speed while the conveyor forward speed can be adjusted using the manual flow valve
- Recommended for tractors capable of 8 - 10 gpm hydraulic flow

DIMENSIONS

Length: 5060mm (199 inches), Width: 2030mm (80 inches)
Height: 2130mm (84 inches)
